

MLC Global Private Equity Fund

Target Market Determination

This Target Market Determination (TMD) describes the investors that make up the target market for this fund and sets out some other matters relevant to the fund's distribution and review. This document is available to the public free of charge. It doesn't form part of the Product Disclosure Statement (PDS) for the fund and it doesn't list all the fund features or terms. The information in this document doesn't take into account any person's individual investment objectives, financial situation or needs. Investors should read the PDS before making any decision regarding the fund.

Section 1 – Target Market and Product Features

An investor who satisfies the following is in the target market for the Fund:

- wants to invest in an actively managed portfolio of private equity investments including access to co-investments, private equity funds and some more liquid private equity investments;
- wants to invest in a portfolio focused on long-term capital growth and the opportunities which private equity can provide;
- can tolerate the risk of capital loss;
- understands the illiquid nature of the asset class and Fund, accepting while MLC intends to make monthly withdrawal offers up to approximately 5% of the Net Asset Value each quarter, this is subject to liquidity being available and is not guaranteed;
- is comfortable having foreign currency exposure i.e. currency risk; and
- wants to invest either:
 - indirectly, through a 'platform product' (such as an investor-directed portfolio service or a 'wrap' style superannuation product); or
 - directly, by application to us (provided the amount they want to invest in the Fund is at least \$20,000 and is an Australian resident).

The Product Features of the Fund are set out in the table below:

Please note, if an investor intends to hold this Fund as part of a diversified portfolio, the Fund should be assessed against the investor's requirements for the relevant portion of the portfolio, rather than the investor's requirements for their portfolio as a whole.

For example, an investor may seek to construct an overall conservative portfolio which includes an allocation to a higher risk investment. In this case, it may be likely that an investment with a higher risk/return profile is consistent with the investor's requirements, even though the risk profile of the investor overall is lower than the investment selected. In making this assessment, please consider all Product Features.

Product Features	Details
Investment objective	
Capital growth	The Fund is designed for investors seeking capital growth, over the long term. To achieve this, the Fund invests in a diverse range of global private equity investments.
Product use as a percentage of an investor's portfolio	
Standalone (75-100%) Core Component (25-75%) Satellite (<25%)	The Fund is designed for use as a satellite component of an investor's broader portfolio of investments, but not as a standalone or core investment solution.
Investment timeframe	
Long term	The Fund is designed for investors who are looking to make a long-term investment with a minimum investment timeframe of 7 to 10 years.
Risk and Return	
High risk & return	The Fund is designed for investors seeking the potential for higher returns and are willing to accept high risk (estimated as 3 to 4 negative annual returns in any 20 year period).
Redemption frequency	
Monthly	The Fund is operated as a non-liquid scheme. MLC intends to make monthly withdrawal offers, however MLC may not make withdrawal offers from time to time.
