

MLC Wholesale IncomeBuilder

TARGET MARKET DETERMINATION

This Target Market Determination (TMD) describes the investors that make up the target market for this trust and sets out some other matters relevant to the trust's distribution and review. This document is available to the public free of charge. It doesn't form part of the Product Disclosure Statement (PDS) for the trust and it doesn't list all the trust features or terms. The information in this document doesn't take into account any person's individual investment objectives, financial situation or needs. Investors should read the PDS before making any decision regarding the trust.

Section 1 – Target Market and Product Features

An investor who satisfies the following is in the target market for the Trust:

- wants to invest in shares in Australian companies that are expected to deliver a tax-efficient dividend stream over time that is sustainable or growing;
- wants tax-efficient returns by:
 - generally investing in companies expected to have high franking levels relative to the broad market, and
 - where possible, efficiently managing the realisation of capital gains as well as other transaction and trading costs;
- wants income and long-term growth in the value of their investment; and
- who wants to invest either:
 - indirectly, through a 'platform product' (such as an investor-directed portfolio service or a 'wrap'-style superannuation product); or
 - directly, by application to us (provided the amount they want to invest is at least \$500,000 and is an Australian or New Zealand resident).

The Product Features of the Trust are set out in the table below:

Please note, if an investor intends to hold this Trust as part of a diversified portfolio, the Trust should be assessed against the investor's requirements for the relevant portion of the portfolio, rather than the investor's requirements for their portfolio as a whole.

For example, an investor may seek to construct an overall conservative portfolio which includes an allocation to a higher risk investment. In this case, it may be likely that an investment with a higher risk/return profile is consistent with the investor's requirements, even though the risk profile of the investor overall is lower than the investment selected. In making this assessment, please consider all Product Features.

Product Features	Details
Investment objective	
Capital growth Regular income	The Trust is designed for investors seeking a regular income stream (excluding capital gains) that grows each year, and capital growth, by investing primarily in Australian shares. To achieve this, the Trust invests primarily in listed Australian companies that have the potential to provide future sustainable or growing dividends. The Trust is expected to generate tax-efficient returns by: <ul style="list-style-type: none"> generally investing in companies expected to have high franking levels relative to the broad market, and where possible, efficiently managing the realisation of capital gains as well as other transaction and trading costs.
