A year in review

The 2012/13 financial year has been positive for your super fund. Investment returns were strong, and changes were made to legislation which aim to deliver a stronger, more efficient super system.

Average super fund returns achieved double figures, boosted by sharp increases in growth assets. Global shares made significant gains, closely followed by Australian shares and property securities. Defensive assets were also supportive, with global fixed income rising solidly.

Also over the year, the Government made important changes to super legislation. These changes aim to deliver a stronger, more efficient super system, and will help you take greater control of your super by making it easier to consolidate your accounts, reduce the fees you pay and find your lost super. We believe these changes will also help members who don't take an active role in managing their super to maximise their retirement incomes.

We're investing significantly to comply with the changes to super legislation and, at the same time, we're improving our products and processes to make managing your money easier for you. You may have already noticed some changes, and there are more to come.

Nicole Smith
Chair
MLC Nominees Pty Limited

Looking out for your interests

The directors of the Trustee Board have a variety of work and life experiences which help them represent your interests.

Made up of executive and non-executive directors who are personally responsible for any decisions they make, their duties include:

- providing investment choice
- ensuring your interests are maintained, and
- keeping you informed of any changes.

The Trustee Board is liable for its activities and has professional indemnity insurance.

The Trustee Board has appointed MLC Limited (ABN 90 000 000 402) to carry out the day-to-day investment management and administration of The Universal Super Scheme.

Meet the Board

The directors are:

Nicole Smith (Chair)

Trustee director movements

Geoff Webb retired effective 31 December 2012.

Richard Morath retired effective 31 December 2012.

Nicole Smith became Chair of the Board effective 1 January 2013.

Trevor Hunt was appointed non-executive director effective 1 March 2013.

Michael Clancy moved to non-executive status effective 19 April 2013.

John Reid moved to non-executive status effective 28 June 2013.

Annual audit

Each year we are audited by an independent company. We're pleased to report we've met all our obligations and received a clean audit report. All investments are in life insurance policies, so this report doesn't include statements of assets and income or the auditor's report and accounts. However, you can easily get a copy of this information by calling us.

The MLC group of companies is the wealth management division of the National Australia Bank (NAB) (ABN 12 004 044 937).

Some things you should know

Transfers to an Eligible Rollover Fund

We may transfer your account balance to an Eligible Rollover Fund if:

- your investment switching activity is deemed to be contrary to the interests of other members
- your account has been closed and you are eligible for a payment from MLC and we've not received any instructions from you, or
- other situations permitted under the law.

The Eligible Rollover Fund we currently use is the Australian Eligible Rollover Fund and it can be contacted on **1800 677 424**.

We'll advise you in writing to your last known address if we intend to transfer your account balance and will proceed if you don't respond with instructions regarding an alternative super fund.

Please note, a transfer to an Eligible Rollover Fund may be detrimental to you as the Eligible Rollover Fund may have a different fee structure, different investment strategies and may not offer insurance benefits.

Transfers to the Australian Taxation Office (ATO)

The law and rules defining the transfer of unclaimed superannuation money to the ATO can be viewed on the ATO website at **ato.gov.au**

In summary, we're required by law to transfer your account to the ATO if one of the following situations occurs:

- your account balance is less than \$2,000 and
 - no contributions have been made to your account for 12 months and we have no way of contacting you, or
 - your account was set up through your employer and there have been no contributions made for over 5 years
- you're over 65 (male) or 60 (female), no contributions have been made to your account for over 2 years and you haven't contacted us for at least 5 years
- the ATO informs us that you were a former temporary resident and left the country over six months ago, or
- upon your death and after an extended period of time, we've tried but been unable to identify or contact the beneficiary of your account.

The law also requires us to transfer to the ATO the portion payable to your spouse as a result of Family Law ruling, if after an extended period of time we have not been able to contact your spouse, or your spouse's beneficiary/estate.

If your account is transferred to the ATO for any of these reasons, you will then have to contact the ATO to claim your benefit.

Surcharge assessment for prior years

The Superannuation Contributions Surcharge (Surcharge) was removed in relation to contributions made from 1 July 2005. However a Surcharge liability may still arise in respect of relevant contributions made in prior years.

The Surcharge assessment may be sent to The Universal Super Scheme, in which case, the amount will generally be deducted from your account (unless it is a pension account) and paid to the ATO.

If you have withdrawn your account balance (in whole or part) or commenced a pension, the ATO may send the Surcharge assessment to your new super arrangement or directly to you. Where you receive the assessment directly, you will be responsible for paying the Surcharge to the ATO. If you have a pension account, you are generally able to ask us to pay you a lump sum in order to meet your Surcharge liability.

If you have any questions about the Surcharge please visit the ATO website at **ato.gov.au** or call **13 10 20**.

Resolving complaints

We can usually resolve complaints over the phone. If we can't or you're not satisfied with the outcome, please write to us. We'll work to resolve your complaint as soon as possible. If you're not satisfied with our decision you can get further advice from the Superannuation Complaints Tribunal by calling **1300 884 114**, or emailing **info@sct.gov.au**

More information is available on **sct.gov.au**

This section is specific to MLC MasterKey products and MLC Personal Superannuation.

It is a reminder about how your account operates.

Protecting all members

At MLC we look out for you, so we've introduced processes that protect the interests of all members.

Frequent switching

You should not invest in these products if you intend to switch your investments frequently in the pursuit of short-term gains.

We monitor all investment options for abnormal transaction activity because this sort of activity can have adverse impacts for other members.

To maintain equity the Trustee has the right to deal with members who frequently switch by:

- delaying, limiting or rejecting their future switch requests
- cancelling membership and transferring their account balance to the Australian Eligible Rollover Fund.

Prudent management

We reserve the right to refuse applications or vary the terms for processing any transaction in certain circumstances, such as when:

- there are significant falls in investment markets
- we have difficulty in completing transactions due to low liquidity, which could occur with investment options that use higher risk strategies.

We also reserve the right to suspend processing of requests for up to five business days at the end of the financial year.

Should any of these events occur we'll use the unit price on the day we process your request.

Some things you should know

Transaction cost policy

The Trustee is responsible for ensuring that the costs of buying and selling assets when members transact are shared in an equitable way. This is achieved by:

- meeting costs as they arise for an investment option as a whole by offsetting them against investment earnings. This is the approach when there is a single unit price, sometimes called no-spread unit pricing, or
- meeting costs as they arise due to member transactions by offsetting them against the individual member assets. This is the approach when investment options have a buy-sell spread in the unit price.

The transaction costs borne by an investment option are identical in each approach and, generally, both methods work well.

However, having a buy-sell spread in the unit price is acknowledged as industry best practice and is the more equitable method in certain extreme situations.

Therefore, the investment options offered through products launched by us from December 2006 use unit pricing with buy-sell spreads (eg MLC MasterKey Super & Pension, MLC MasterKey Super & Pension Fundamentals).

For no-spread investment options, we allow for expected transaction costs in the valuation of assets to protect members in an investment option that is in decline.

We will be implementing the buy-sell pricing approach on an option by option basis in coming years as older products stop receiving substantial inflows.

When implemented, there will be a once-off immediate fractional reduction in the unit price for the investment option.

This will be offset by improved investment earnings over following years (relative to the performance that would have been experienced had the transaction cost policy not been implemented).

Note: The transaction cost policy is a part of MLC's Policy on Determining Spreads.

How your money is invested

In this section we tell you how the Trustee invests your money.

One of the Trustee's responsibilities is to make sure your investments are managed according to an agreed investment strategy and objective.

As you can see, we offer many products for you to invest in. Some of these will have similar investment objectives and strategies.

To make this section easier for you to read we've grouped products with common objectives and strategies together.

Derivatives

Derivatives are contracts that have a value derived from another source such as an asset, market index or interest rate. There are many types of derivatives including swaps, and options. They are a common tool used to manage risk or improve returns.

Some derivatives allow investment managers to earn large returns from small movements in the underlying asset's price. However, they can lose large amounts if the price of the underlying asset moves against them.

Investment managers, including MLC, have derivatives policies which outline how derivatives are managed.

Information on MLC's derivative policy is available on mlc.com.au

How your money is invested

Product name	Investment objective
MLC MasterKey & MLC Personal Superannuation MLC MasterKey Super & Pension MLC MasterKey Super & Pension Fundamentals MLC MasterKey Superannuation MLC MasterKey Business Super MLC MasterKey Personal Super MLC MasterKey Allocated Pension MLC MasterKey Term Allocated Pension MLC Personal Superannuation	To provide a selection of investment options so you can invest according to your individual needs and circumstances. You can find specific details about the individual investment options available on pages 12 to 43.

Investment strategy

The Trustee invests in a policy issued by MLC Limited who, in turn, invests in a suitably structured portfolios. Each investment option available has an individual investment objective and strategy.

About your account value

When money is paid into your account, units are allocated to your account and when money is paid out, units are deducted from your account.

The value of your account is based on:

- the number of units in your chosen investment options, and
- the price of those units.

The overall value of your account will change according to the unit price and the number of units you hold.

Unit prices are calculated as at the end of each business day and robust unit pricing policies are used to do this.

The unit price will reflect the performance of the underlying assets, income earned, fees, expenses and taxes paid and payable.

The performance of the underlying assets is influenced by movements in investment markets such as local and overseas share markets, bond and property markets.

If you would like to find out more about our unit pricing philosophy, go to mlc.com.au

NAB Fixed Rate Funds

A guaranteed interest rate is payable for the term selected. Interest is calculated daily and credited:

- annually on 30 June each year
- on withdrawal or switch, or
- on maturity.

An exit fee applies if you withdraw before the maturity date.

This fee will reduce the earnings on your investment.

NAB Term Deposits

A guaranteed interest rate is payable for the term selected. Interest is calculated daily and credited annually on the anniversary of the term, or on maturity.

Early withdrawals are only permitted in extreme circumstances and will result in reduced interest.

How your money is invested

Product name	Investment objective
MLC Super Pension Plan	
MLC Super Pension Plan	To provide a fixed regular income stream for a selected period.
MLC Capital Guaranteed products	
MLC Capital Guaranteed Personal Super Savings Plan MLC Capital Guaranteed Personal Super Bond MLC Maturity Growth Superannuation Plan	To balance risk and return considerations while securing guarantees to members.
MLC Whole of Life Superannuation MLC Endowment Superannuation MLC Pure Endowment Superannuation	Aims to provide a guaranteed benefit payable on maturity of the policy or your death.
MLC Insurance products	
MLC Life Cover Super MLC Super Group Insurance MLC Insurance (Super)	Your contributions are used to pay the premiums for the insurance cover selected.

Investment strategy	About your account value
The Trustee has purchased an annuity policy with MLC Limited.	This plan provides a fixed regular income stream for a selected period.
The Trustee invests in policies issued by MLC Limited who, in turn, invests in a suitably structured portfolio of securities. Surplus assets, over and above those required to fund guaranteed benefits, are generally invested in a more diversified portfolio to increase potential returns.	<p>A declared rate of interest is allocated to your account after 30 June each year.</p> <p>Investment performance in MLC Capital Guaranteed Personal Super Savings Plan and MLC Capital Guaranteed Personal Super Bond is included with your Annual Statement.</p> <p>If you withdraw during the year, an interim rate is calculated and applied to your daily account balance before your benefit is paid.</p> <p>The interim rate is set with the intention to reflect the year to date earnings and, as a result, may differ from the declared rate.</p>
The Trustee invests in policies issued by MLC Limited who, in turn, invests in a suitably structured portfolio of securities. Surplus assets, over and above those required to fund guaranteed benefits, are generally invested in a more diversified portfolio to increase potential returns.	In most cases, these products earn bonuses which are allocated annually. Your bonuses, where applicable, are advised each year in your Annual Statement.
	These products do not have an account balance or value.

Investment option profiles

These are important notes about the investment option profiles.

Standard Risk Measure

Investment risk is one of many things that should be considered when making an investment decision. The Standard Risk Measure is a simple measure designed to help you compare investment risk across the investment options.

The Standard Risk Measure is the estimated number of negative annual returns in any 20 year period. However, the number of negative returns that occur in a 20 year period may be different to the estimate.

The risk categories are:

Risk band	Risk label	Estimated number of negative annual returns over any 20-year period
1	Very low	Less than 0.5
2	Low	0.5 to less than 1
3	Low to medium	1 to less than 2
4	Medium	2 to less than 3
5	Medium to high	3 to less than 4
6	High	4 to less than 6
7	Very high	6 or greater

The Standard Risk Measure is based on industry guidelines however it isn't a complete assessment of investment risk. For example:

- it doesn't capture the size of a possible negative return or the potential for sufficient positive returns to meet your objectives, and
- it doesn't take into account the impact of fees and tax. These would increase the chance of a negative return.

There are many ways you, and your financial adviser, can assess the impact of risk on your investment strategy. You should make sure you're comfortable with the risks and potential losses associated with the investment options you choose.

For information on how we calculate the Standard Risk Measure please go to mlc.com.au/srm

Investment options

The Investment Menu may change at any time and is available on our website.

For more detailed information, including the latest available asset allocations, please visit our Fund Profile Tool on mlc.com.au or contact your financial adviser. You can also find more information about your investment returns on your Annual Statement.

Closed investment options

Only members who have units in closed investment options can make additional contributions to those options. Please see pages 44 to 49.

Investment fees

Investment fees are reflected in the daily unit price for each investment option and vary as investment costs change. Some investment managers provide a rebate on their investment management fee, which we pass entirely back to your account. The investment fees in the investment option profiles are shown after allowing for this rebate.

Performance fees

An investment manager may charge a performance fee when its investment returns exceed a specified level. Where applicable, the actual performance fee for the year ending 30 June 2013 is included in the investment fees shown.

The actual performance fee charged in future periods may differ from that disclosed in this report.

You can get more information on how performance fees are calculated by going to the investment managers' Product Disclosure Statement available on mlc.com.au

Investment options managed by MLC – Investment fees

The table below reflects the indicative investment fees as at 30 June 2013 for the following products:

- MLC MasterKey Super
- MLC MasterKey Super Fundamentals
- MLC MasterKey Business Super

MLC Horizon Series of portfolios

Investment objective

Each portfolio aims to grow your wealth for an expected level of risk.

About the investment options

Where you are in life, and what your investment goals are, will influence the kind of investment you choose.

We designed the MLC Horizon Series of portfolios with this in mind, as each portfolio offers a different risk and return expectation. So whatever your circumstances are now, and as they change over time, you can choose the portfolio to suit your specific needs.

At the lower end of the risk and return potential is MLC Horizon 1. This invests in defensive assets such as fixed income and cash. At the higher end of the risk and return potential is MLC Horizon 7 which gears its investment into growth assets such as shares.

The portfolios are actively managed and broadly diversified within asset classes, across asset classes and across investment managers. These managers invest in many companies and securities around the world.

	MLC Horizon 1 Bond Portfolio	MLC Horizon 2 Capital Stable Portfolio																												
The investment option may be suited to you if ...	<ul style="list-style-type: none"> • you want to invest almost entirely in defensive assets • you give priority to preserving your capital 	<ul style="list-style-type: none"> • you want to invest with a bias to defensive assets, with some exposure to growth assets • preserving your capital is an important but not overriding concern 																												
Minimum suggested time to invest	Two years	Three years

MLC Horizon Series of portfolios

	<h2>MLC Horizon 7 Accelerated Growth Portfolio</h2>													
<p>The investment option may be suited to you if ...</p>	<ul style="list-style-type: none"> • you want a portfolio focussed on long-term capital growth • you want to gear a portfolio of growth assets but don't want the burden of obtaining and managing your own loan • you expect growth in the assets' value to exceed the costs of gearing • you're comfortable with the risks of gearing including extra volatility and increased risk of capital loss. And you understand that at its target gearing level (described below), theoretically, the Portfolio's unit price would fall to zero if its asset values fell suddenly by 77%. Lesser falls may cause substantial reductions in unit prices which may trigger the suspension of withdrawals and applications 													
<p>Minimum suggested time to invest</p>	Ten years													
<p>Target allocation of \$1,000 (at 30 June 2013)</p>	<table> <tr> <td>■ Australian shares</td> <td>\$520</td> </tr> <tr> <td>■ Global shares (hedged)</td> <td>\$200</td> </tr> <tr> <td>■ Global shares (unhedged)</td> <td>\$440</td> </tr> <tr> <td>■ Global private assets (hedged)</td> <td>\$80</td> </tr> <tr> <td>□ Other</td> <td>\$60</td> </tr> <tr> <td>■ Borrowing</td> <td>-\$300</td> </tr> </table>	■ Australian shares	\$520	■ Global shares (hedged)	\$200	■ Global shares (unhedged)	\$440	■ Global private assets (hedged)	\$80	□ Other	\$60	■ Borrowing	-\$300	<p>Target gearing level</p> <p>As at 30 June 2013, for every \$1,000 you have invested, the Portfolio targets borrowings of \$300. The actual gearing level changes every day. That's why we monitor the Portfolio's actual gearing level against its target and regularly move the borrowings back to the target level.</p> <p>Seeking to maintain the target gearing level involves adjusting the borrowings as well as buying and selling assets. This increased trading will incur transaction costs and realise tax gains and losses.</p> <p>We may change the target gearing level without prior notice to you.</p> <p>In some circumstances it is possible that the Portfolio may not be geared for a, potentially extended, period of time.</p> <p>Target gearing levels are available on mlc.com.au. You should check this to ensure you are comfortable with the target gearing level prior to investing in the Portfolio.</p>

MLC asset class portfolios

Fixed income

	MLC Diversified Debt Fund
Investment objective	The fund is designed to be a complete portfolio for the fixed income asset class, and aims to deliver growth by using investment managers that invest and diversify across many companies and securities within that asset class.
About the investment option	<p>The fund is diversified across different types of fixed income securities in Australia and around the world. The securities are predominantly investment grade and typically longer dated. The average term to maturity is normally in the range of three to six years.</p> <p>Foreign currency exposures will generally be substantially hedged to the Australian dollar.</p> <p>As a result of capital restructures of bond issuers, the fund may have an incidental exposure to shares from time to time.</p>
The investment option may be suited to you if ...	<ul style="list-style-type: none"> • you want to invest in a defensive portfolio that's actively managed and diversified across investment managers, countries, bond sectors and securities.
Minimum suggested time to invest	Three to five years
Target allocation (at 30 June 2013)	48% Australian fixed income 52% Global fixed income
How you can assess performance	One way you can assess the performance of this fund is against its market benchmark over the long term. When making this assessment, be aware that the market benchmark doesn't take into account fees and taxes that may apply to your account.
Market benchmark	50% UBS Composite Bond Index (All Maturities) & 50% Barclays Global Aggregate Bond Index (hedged into Australian dollars)

MLC Index Plus portfolios

Investment objective

Aims to grow your wealth for an expected level of risk.

About the investment options

Each MLC Index Plus portfolio offers a diversified investment solution. They are designed using all aspects of our approach to investing, except they have a greater focus on:

- investing in conventional asset classes and
- index (passive) rather than active managers (as shown in the target allocation).

We expect index managers to provide similar returns to the market (before taking into account fees and taxes).

	MLC Index Plus Conservative Growth Portfolio

MLC Long-Term Absolute Return Portfolio

	MLC Long-Term Absolute Return Portfolio																								
Investment objective	Aims to maximise its return (above inflation, and after deducting investment fees and tax) over a 20-year period, while ensuring a high likelihood of it being positive over that timeframe.																								
About the investment option	<p>The Portfolio is designed using three steps:</p> <ol style="list-style-type: none"> 1. It invests broadly across asset classes, many of which are unconventional (eg insurance related investments, private assets and inflation-linked bonds). This reduces its dependency on a single source of return. While investing in shares will generally be an important part of the Portfolio's strategy, its exposure to the Australian share market shouldn't dominate. The Portfolio also uses a number of investment managers that aren't limited to just one asset class, and may apply short-selling techniques to enhance returns. Over time, the Portfolio may take advantage of a variety of investment opportunities as they arise. 2. This diversified strategy is then geared in order to meet its long-term objective. 3. We then take this strategy and adjust it to exploit swings in return and risk potential. We base these adjustments on our three to seven-year assessment of the market environment. <p>The resulting target asset allocation is shown below.</p> <p>The Portfolio invests significantly in assets that can't easily be sold. And it may be significantly geared (for every \$1,000 you invest the Portfolio may borrow up to \$400, and in extreme market conditions this level of gearing may be exceeded). The combination of these facts means that, from time to time, we may suspend your ability to put money into or take money out of the Portfolio.</p>																								
The investment option may be suited to you if ...	<p>You want to:</p> <ul style="list-style-type: none"> • take a genuinely long-term investment approach • focus on achieving returns above inflation, and can tolerate significant short-term volatility to achieve those returns • access the benefits of a geared portfolio and are comfortable with the risks of gearing including extra volatility and increased risk of capital loss • diversify across a wider range of asset classes, and • access long-term and/or unconventional asset classes and investment strategies while accepting that such strategies may take years to reward you. <p>And you're willing to accept:</p> <ul style="list-style-type: none"> • both financially and emotionally, that the Portfolio may have substantially different returns to other investments • the Portfolio may be illiquid for some time, potentially years, and • at its target gearing level (at 30 June 2013) the Portfolio's unit price would theoretically fall to zero if its asset values fell suddenly by 92%. Lesser falls may cause substantial reductions in unit prices which may trigger the suspension of withdrawals and applications. 																								
Minimum suggested time to invest	Seven to ten years

Cash and term deposits

	MLC Cash Fund	NAB Term Deposits
Investment objective	Aims to provide competitive returns relative to the Reserve Bank of Australia's Cash Rate Target.	The interest rate on a term deposit is fixed for the term you select.
About the investment option	<p>The fund invests in deposits with banks (100% National Australia Bank as at 30 June 2013) and may also invest in other comparable high quality securities.</p> <p>MLC Limited guarantees the value of your investment in the MLC Cash Fund (before the deduction of tax and fees).</p>	<p>You can select a six month, one year or two year term. You can find current interest rates on mlc.com.au</p> <p>How much you can invest You can invest up to 70% of your account balance in term deposits. You can't invest once you reach the age of 90 or as part of a regular contribution strategy.</p> <p>Term deposits are invested for a fixed term. Early withdrawals are only permitted in extreme circumstances and will result in reduced interest.</p> <p>Maintaining your account balance When you invest in term deposits, you'll also need to make sure you maintain at least 10% of each of your super and pension account balances in other investment options (not term deposits).</p> <p>This allows us to process your withdrawals requests and pension payments and also pay fees and other costs for your account. If you make a one-off withdrawal request which would make your account balance fall below this 10% minimum, then we may not process it.</p> <p>How interest is paid Interest will be paid into your nominated investment option on maturity. Interest on the two year term is paid annually on the anniversary into the MLC Cash Fund with the remaining interest paid on maturity.</p>
The investment option may be suited to you if ...	<ul style="list-style-type: none"> • you want to invest in a low risk cash portfolio. 	<ul style="list-style-type: none"> • you want to achieve a fixed rate of return for a set period.

Fixed income

	Vanguard® Australian Fixed Interest Index Fund	Vanguard® International Fixed Interest Index Fund (Hedged)
Investment objective	To track the return (income and capital appreciation) of the UBS Composite Bond Index before taking into account Fund fees, expenses and tax.	To track the return (income and capital appreciation) of the Barclays Capital Global Treasury Index hedged into Australian dollars before taking into account fund fees, expenses and tax.
About the investment option	<p>The UBS Composite Bond Index is a value-weighted index of approximately 360 securities (bonds) issued by the Commonwealth Government of Australia, State Government authorities and treasury corporations, as well as investment – grade corporate issuers.</p> <p>Investment-grade issuers are defined as those rated BBB- or higher by Standard & Poor's or Baa3 or higher by Moody's. Bond indices change far more quickly than share indices because bonds have a finite life (maturity). Every maturity and inclusion of new issues changes in the composition of the index and requires Vanguard to modify the portfolio.</p>	<p>The Barclays Global Treasury Index is a value-weighted index of approximately 1,200 securities (bonds) issued by the governments of approximately 38 countries.</p> <p>Bond indices change far more quickly than share indices because bonds have a finite life (maturity).</p> <p>Every maturity and inclusion of new issues changes in the composition of the index and requires Vanguard to modify the portfolio.</p>
The investment option may be suited to you if ...	<ul style="list-style-type: none"> • you have a medium term investment horizon, seeking a steady and reliable income stream. 	<ul style="list-style-type: none"> • you have a medium term investment horizon, seeking a steady and reliable income stream.

Property securities

	Legg Mason Property Securities Trust	Vanguard® Australian Property Securities Index Fund
Investment objective	To provide before fees and taxes a return of 1.5% pa, in excess of the S&P/ASX 300 A-REIT Accumulation Index over rolling three-year periods.	To track the return (income and capital appreciation) of the S&P/ASX 300 A-REIT Index before taking into account Fund fees, expenses and tax.
About the investment option	The Fund invests in Australian listed property trusts and property related listed equities and may hold cash. The investment process is based on long-term cash flow based analysis and bottom-up selection.	The S&P/ASX 300 A-REIT Index comprises between 20 and 30 property securities (shares) listed on the Australian Securities Exchange (ASX). The number of securities in the index may vary from time to time. These securities are Real Estate Investment Trusts and companies that own real estate assets and derive a significant proportion of their revenue from rental income. The Fund will hold all of the securities in the index most of the time, allowing for individual security weightings to vary marginally from the index from time to time. The Fund may invest in securities that have been removed from or are expected to be included in the index.
The investment option may be suited to you if ...	<ul style="list-style-type: none"> • you seek an investment in property securities and have long term financial goals. 	<ul style="list-style-type: none"> • you want long-term capital growth, some tax-effective income, and you have a higher tolerance for the risks associated with share market volatility.

Arnhem Australian Equity Fund	Ausbil Australian Emerging Leaders Fund	Fairview Equity Partners Emerging Companies Fund
To provide investors with capital appreciation over the medium term (five years) by investing in Australian listed securities.	To provide returns above the benchmark over the medium to long term, before fees and tax.	To provide long-term capital growth and some income by investing primarily in a diverse portfolio of smaller companies listed, or expected to be listed, on the Australian Securities Exchange.
The Fund seeks to be fully invested in 30 to 40 companies that have strong or leading positions in structurally attractive, growing industries and above-average sustainable earnings growth. Risk is managed by favouring these companies over those that are in declining or unprofitable industries.	The Fund invests in mid and small cap stocks primarily chosen from the S&P/ASX 300 Index, but generally excludes securities from the S&P/ASX 50 Leaders Index. At all times the Fund will favour sectors and specific companies which it believes will experience positive earnings revisions.	Fairview aims to achieve returns above its benchmark through its core active investment process. This collaborative approach is research driven, combining high levels of company contact, detailed analysis, a robust peer review process and appropriate risk controls. The NAB group holds a minority interest in the investment manager, Fairview.
<ul style="list-style-type: none"> • you want to invest in an active Australian equities fund. 	<ul style="list-style-type: none"> • you wish to benefit from the long-term capital gains available from share investments and are comfortable with fluctuations in capital value in the short to medium term. 	<ul style="list-style-type: none"> • you wish to benefit from an actively managed Australian smaller companies equity portfolio managed by a specialist boutique investment manager. • you want to diversify your Australian equity portfolio to include access to a range of small and emerging companies that show strong growth potential. • you are able to accept the volatility of investing in growth assets. • you believe in the greater long-term wealth creation potential of equities.

Australian shares

	Investors Mutual Australian Share Fund	MLC-Vanguard Australian Share Index Fund
Investment objective	To outperform the S&P/ASX 300 Accumulation Index over rolling four-year periods, after taking into account fees, but before tax.	Aims to match the return of the S&P/ASX 200 Accumulation Index, before taking into account fees, expenses and tax.
About the investment option	Invests in a diversified portfolio of quality Australian companies that display four characteristics: a sustainable competitive advantage, recurring earnings, capable management and the ability to grow over time. Investors Mutual Limited believes in purchasing quality companies at attractive prices when a company's price is below its long-term value.	A representative sample of shares is selected from the Index to form the portfolio. Individual security weightings may vary marginally from the Index from time to time. The fund may invest in securities that have been, or are expected to be, included in the Index.
The investment option may be suited to you if ...	<ul style="list-style-type: none"> • you want to invest in an active Australian shares fund. 	<ul style="list-style-type: none"> • you want to invest in a portfolio of Australian shares that produces similar returns to the market.

Perennial Value Shares Wholesale Trust	Perpetual Wholesale Australian Fund	Perpetual Wholesale Ethical SRI Fund
To provide a total return (after fees) that exceeds the S&P/ASX 300 Accumulation Index measured on a rolling three-year basis.	Aims to provide long-term capital growth and income through investment in quality shares.	Aims to provide long-term capital growth and income through investment in quality shares of socially responsible companies.
Perennial invests in a range of companies listed (or soon to be listed) on the ASX which Perennial Value, the investment manager, believes have sustainable operations and whose share prices offer good value. The portfolio will hold in the range of 20–70 stocks.	Perpetual's priority is to select those companies that represent the best investment quality and are appropriately priced. Investments are carefully selected on the basis of four key investment criteria: conservative debt levels, sound management, quality business, and for industrial companies, recurring earnings. The Fund invests primarily in Australian listed, or soon to be listed, shares but may have up to 20% exposure to stocks outside Australia. Currency hedges may be used from time to time. Derivatives may be used.	Perpetual's priority is to select those companies that represent the best investment quality and are appropriately priced. Australian shares

	Perpetual Wholesale Smaller Companies Fund No. 2	Schroder Wholesale Australian Equity Fund
Investment objective	Aims to provide long-term capital growth and income through investment in quality Australian shares which, when first acquired, do not rank in the S&P/ASX 50 Index.	To outperform the S&P/ASX 200 Accumulation Index after fees over the medium to long term by investing in a broad range of companies from Australia and New Zealand.
About the investment option	Perpetual's priority is to select those companies that represent the best investment quality and are appropriately priced. Investments are carefully selected on the basis of four key investment criteria: conservative debt levels, sound management, quality business, and for industrial companies, recurring earnings. Derivatives may be used.	Schroder's investment philosophy is corporate value creation or the ability to generate returns on capital higher than the cost of capital. This leads to sustainable share price out-performance in the long term. The investment process is a combination of qualitative industry and company competitive position analysis, and quantitative financial forecasts and valuations.
The investment option may be suited to you if ...	<ul style="list-style-type: none"> • you want to invest in a smaller companies Australian shares fund. 	<ul style="list-style-type: none"> • you want to invest in an active Australian shares fund.

PM CAPITAL Absolute Performance Fund	Vanguard® International Shares Index Fund	Vanguard® International Shares Index Fund (Hedged)
To provide positive investment returns over a seven year investment horizon by investing in a concentrated portfolio of global equities.	To track the return (income and capital appreciation) of the MSCI World (ex-Australia) Index (net dividends reinvested), in Australian dollars, before taking into account Fund fees, expenses and tax.	To track the return (income and capital appreciation) of the MSCI World (ex-Australia) Index (net dividends reinvested), hedged into Australian dollars, before taking into account Fund fees, expenses and tax.
<p>PM CAPITAL believes that the best way to preserve and enhance wealth is to 'buy a good business at a good price'. The Fund will typically hold between 35–45 globally listed equities, and may:</p> <ul style="list-style-type: none"> invest in cash (up to 100% of assets) if it cannot find appropriate investments, or use leverage, use option strategies, hold interest bearing debt securities, use derivatives, and short sell stocks. 	The Fund will hold most of the securities in the Index, allowing for individual security weightings to vary from the Index from time to time. The Fund may invest in securities that have been or are expected to be included in the Index. The Fund will be fully exposed to the fluctuating values of foreign currencies, as there will not be any hedging of foreign currencies to the Australian dollar.	The Fund meets its investment objective by investing in the Vanguard International Shares Index Fund, securities in the index Fund and forward foreign exchange contracts.
<ul style="list-style-type: none"> you are comfortable with the risks involved in share market investing and are prepared to take a genuine long term investment horizon. 	<ul style="list-style-type: none"> you are seeking long-term capital growth, some income, international diversification, and with a higher tolerance for the risks associated with share market volatility. 	<ul style="list-style-type: none"> you are seeking long-term capital growth, some income, international diversification, and with a higher tolerance for the risks associated with share market volatility.

	AMP Capital Wholesale Value Global Equity Fund	BlackRock Balanced Fund
Investment objective	To provide long-term capital value and outperform the Morgan Stanley Capital International World ex-Australia Index (net dividends reinvested in Australian dollar terms) after costs over rolling five year periods.	To provide the highest possible returns consistent with a 'balanced' investment strategy encompassing: <ul style="list-style-type: none"> • a bias towards growth assets, • a bias towards Australian assets, and • active asset allocation, security selection and risk management.
About the investment option	The Fund invests in companies that appear undervalued relative to long-term earnings potential. Companies will have a minimum market capitalisation at purchase of US\$750 million and will be attractively priced relative to their future earnings power. Investments in foreign markets will be exposed to relevant foreign currencies, active currently management is used with the objective to enhance return and potentially lower risk over the long term. When the Fund is not fully invested in the investments outlined above, it may hold cash.	The Fund invests in a diversified portfolio of physical instruments (including shares, debt securities, property trusts) derivatives, and structured investments (which combine physical instruments and derivatives). Foreign currency exposure is limited to 20% of the Funds assets. The Fund uses derivatives extensively.
The investment option may be suited to you if ...	<ul style="list-style-type: none"> • you're prepared to accept a high level of volatility and risk as a trade-off for returns that might typically be expected to be above those returned by other asset classes over the longer-term. 	<ul style="list-style-type: none"> • you want a combination of capital growth and income with a greater weighting to growth assets.

BT Wholesale Balanced Returns Fund	BT Wholesale Active Balanced Fund	Colonial First State Wholesale Diversified Fund
To provide a return (before fees, costs and taxes) that exceeds the Fund's benchmark over the medium to long term.	To provide a return (before fees, costs and taxes) that exceeds the Fund's benchmark over the medium to long term. The benchmark is created from a range of published indices. The benchmark is based on the asset allocation neutral position and the index returns from each asset class.	To provide medium to long term capital growth, together with some income, by investing in cash, fixed interest, property and shares.
The Fund is an actively managed diversified portfolio that invests in Australian and international shares, Australian and international property securities and Australian and international fixed interest, cash and alternative investments. The Fund has a higher weighting towards growth assets than defensive assets.	The Fund is an actively managed diversified portfolio that invests in Australian and international shares, Australian and international fixed interest, Australian and international property securities, alternative investments and cash. The international fixed interest, international property and international alternative investment exposures are generally fully hedged to the Australian dollar. Generally, the Fund's international share exposure will not be hedged to the Australian dollar but is actively managed.	The Fund invests in a diversified portfolio made up of 70% growth assets (shares and property) and 30% defensive assets (fixed interest and cash). Allocations are reviewed regularly although a reallocation is only considered in response to a fundamental change in long-term expectations or market demand. The Fund may hedge some of its currency exposure.
