

With you

Annual Report 2012

**MLC Navigator Access
Super and Pension**

Preparation date:
31 October 2012

Issued by: The Trustee,
NULIS Nominees (Australia) Limited
ABN 80 008 515 633 AFSL 236 465

for MLC Superannuation Fund
ABN 40 022 701 955

This annual report is your update on how your money is invested and a reminder of some things you should know.

The Fund's Financial Reports are also provided.

This is the annual report for the MLC Superannuation Fund and is relevant to MLC Navigator Access Super and Pension Service.

We've also included an update on how we manage individual investment options.

A year in review

With the market environment continuing to look uncertain in the near future, it's understandable people are keeping a close eye on their super.

Building greater transparency and trust in the financial service industry is a key priority for MLC and the Government. As a result, a number of legislative reforms are being introduced, which will ultimately benefit super members.

During this time of significant change, you'll be pleased to know we're working hard to make sure your interests are both protected and represented.

Thank you for choosing us to help you achieve your retirement goals.

A handwritten signature in black ink that reads "Geoff Webb". The signature is written in a cursive, slightly slanted style.

Geoff Webb

Chairman
NULIS Nominees (Australia) Limited

Looking out for your interests

The directors of the Trustee Board have a variety of work and life experiences which help them represent your interests.

Made up of executive and non-executive directors who are personally responsible for any decisions they make, their duties include:

- providing investment choice
- ensuring your interests are maintained, and
- keeping you informed of any changes.

The Trustee Board is liable for its activities and has professional indemnity insurance.

The Trustee Board has appointed Navigator Australia Limited to carry out the day-to-day administration of the Fund.

The MLC group of companies is the wealth management division of the National Australia Bank (NAB).

Meet the Board

The directors are:

Some things you should know

Transfers to an Eligible Rollover Fund

We may transfer your account balance to an Eligible Rollover Fund if:

- you haven't made a contribution in the last 12 months and your balance falls below \$1,000, or
- we lose contact with you and can't locate you.

The Eligible Rollover Fund we currently use is the Australian Eligible Rollover Fund and it can be contacted on **1800 677 424**.

We'll advise you in writing to your last known address if we intend to transfer your account balance and will proceed if you don't respond with instructions regarding an alternative super fund.

Please note, a transfer to an Eligible Rollover Fund may be detrimental to you as the Eligible Rollover Fund may have a different fee structure, different investment strategies and may not offer insurance benefits.

Transfers to the Australian Taxation Office (ATO)

We're required by law to transfer your account balance to the ATO if:

- we've lost contact with you and your account balance is less than \$200, or
- your account has been inactive for five years, we have not been able to contact you and, with the information reasonably available to us, we're satisfied that it will never be possible to pay the account balance to you, or
- you were a temporary resident and have departed Australia and you haven't claimed your benefit within six months of becoming eligible.

You will then need to contact the ATO to claim your benefit.

Surcharge assessment for prior years

The Superannuation Contributions Surcharge (surcharge) was removed in relation to contributions made from 1 July 2005. However, a surcharge liability may still arise in respect of relevant contributions made in prior years.

The surcharge assessment may be sent to the Fund, in which case, the amount will generally be deducted from your account (unless it's a pension account) and paid to the ATO.

If you've withdrawn your account balance (in whole or in part) or commenced a pension, the ATO may send the surcharge assessment to your new super arrangement or directly to you.

Where you receive the assessment directly, you'll be responsible for paying the surcharge to the ATO. If you have a pension account, you're generally able to ask us to pay you a lump sum in order to meet your surcharge liability.

If you have any questions about the surcharge please visit the ATO website at ato.gov.au or call **13 10 20**.

Illiquid investments and portability

When you ask us to roll over or transfer your account balance, we're required to respond to this within 30 days. There may be a delay in processing your request where part of your account balance is invested in an 'illiquid investment'.

What is an illiquid investment?

An investment is considered illiquid when you're unable to access your investment within the required 30 days, or if you do it would be at a materially lower price. This situation may arise when:

- a fund manager suspends transactions or closes their fund
- the normal redemption processing timeframe for a fund is greater than 30 days, or
- a listed investment is under administration, suspended or delisted.

Where we're unable to process your request within 30 days, we'll notify your financial adviser of this and provide details of the illiquid investments.

Suspended or terminated managed funds

Economic and financial market conditions over the last couple of years resulted in some investment managers suspending redemptions on their funds.

In some cases the managed fund may have been closed.

If you have some of these investments, we've already notified you about these changes.

You can find a summary of these managed funds, including details of their current status on our website.

Some things you should know (cont.)

Resolving complaints

We can usually resolve complaints over the phone. If we can't, or you're not satisfied with the outcome, please write to us. We'll work to resolve your complaint as soon as possible.

If you're not satisfied with our decision you can get further advice from the Superannuation Complaints Tribunal by calling **1300 884 114**, or emailing **info@sct.gov.au**

More information is available on **sct.gov.au**

Protecting all investors

Prudent management

We reserve the right to refuse applications or vary the terms for processing any transaction in certain circumstances, such as when:

- there are significant falls in investment markets, or
- we have difficulty in completing transactions due to low liquidity, which could occur with investment options that use higher risk strategies.

Transaction cost policy

The Trustee is responsible for ensuring that the costs of buying and selling assets when members transact are shared in an equitable way. This is achieved by offsetting the costs of member transactions against individual member assets as they arise.

About your account value

How earnings are reflected in your account

Income from investments will be in the form of capital growth, and distributions that occur at different times throughout the year.

Income received is usually net of fees and charges.

Your income distributions are invested in line with your instructions to:

- reinvest earnings to the selected investment options, or
- deposit earnings to your Transaction Account.

How your account is valued

When money is paid into your account, units are allocated to your account and when money is paid out, units are deducted from your account.

The value of your account is based on:

- the number of units in your chosen investment options, and
- the price of those units.

The overall value of your account will change according to the unit price and the number of units you hold.

Unit prices are calculated as at the end of each business day and robust unit pricing policies are used to do this.

The unit price will reflect the performance of the underlying assets, income earned, fees, expenses and taxes paid and payable.

The performance of the underlying assets is influenced by movements in investment markets such as local and overseas share markets, bond and property markets.

If you would like to find out more about our unit pricing philosophy, go to our website.

How your money is invested

Investment objective

The overall objective is to provide you with the flexibility to plan your own diversified investment option profile by selecting from a range of investment strategies.

A selection of investment options are provided so you can invest according to your individual needs and circumstances.

You can find specific details about the individual investment options available on pages 10 to 27.

The investment options may change at any time and are available on our website. You can also find more information about your investment returns on your annual statement.

Investment fees

The investment fees shown on pages 10 to 27 reflect the actual fees for the year ending 30 June 2012.

Investment fees are reflected in the daily unit price for each investment option and vary as investment costs change.

Some investment managers provide a rebate on their investment management fee, which we pass entirely back to your account. The investment fees in the investment option profiles are shown after allowing for this rebate.

Performance fees

An investment manager may charge a performance fee when its investment returns exceed a specified level. Where applicable, the actual performance fee for the year ending 30 June 2012 is included in the investment fees shown. The actual performance fee charged in future periods may differ from that disclosed in this report.

You can get more information on how performance fees are calculated by going to the investment managers' Product Disclosure Statement available on our website.

Asset allocation

This section details the assets that have a value in excess of 5% of the total assets of the Fund as at 30 June 2012 include:

- NAB Professional Funds Account – 9.62%

Standard Risk Measure

The description of each investment option includes a Standard Risk Measure. This enables members to compare investment options using a simple measure of investment risk. That measure is the estimated number of negative annual returns in any 20-year period. Of course, the number of negative years that occur in a 20-year period may be different to the estimated number.

The Standard Risk Measure categories are based on industry guidelines. The risk categories are:

Risk band	Risk label	Estimated number of negative annual returns over any 20-year period
1	Very low	Less than 0.5
2	Low	0.5 to less than 1
3	Low to medium	1 to less than 2
4	Medium	2 to less than 3
5	Medium to high	3 to less than 4
6	High	4 to less than 6
7	Very high	6 or greater

The Standard Risk Measure is not a complete assessment of investment risk. For example:

- it doesn't capture the size of a possible negative return or the potential for a positive return to be less than a member may need to meet their investment objectives, and
- it doesn't take into account the impact of administration fees and tax. These would increase the chance of a negative return.

There are many ways you, and your financial adviser, can assess the impact of risk on your investment strategy. You should make sure you're comfortable with the risks and potential losses associated with the investment options you choose.

You can read about how we calculate the estimates for the Standard Risk Measure on our website.

Derivatives

Derivatives are a common tool used to enhance returns or manage risk.

They are contracts that have a value derived from an external reference (eg the level of a share price index).

There are many types of derivatives and they can be an invaluable tool for an investment manager.

However, they can also incur significant losses.

MLC's Derivatives Policy, which outlines how we manage exposure on derivatives, is available on our website.

Investment option profiles

	Access Cash	Access AXA Australian Monthly Income (closed)
Investment objective	To achieve returns in the short term that are competitive with that available from the short term money market (before taking into account fees and taxes).	See below.
About the investment option	Invests primarily in bank deposits and money-market securities issued by the Australian government, state government, banks and companies, but may also invest in longer maturity mortgage/asset backed securities and corporate bonds with floating interest rates.	The Fund is in the process of being wound up with capital repayments to investors intended to be complete by mid 2014. AXA will continue to make income distributions throughout the wind up process and actively manage the assets in the best interests of the unitholders.
The investment option may be suited to you if	<ul style="list-style-type: none"> ■ you want a low risk investment. 	Not applicable.
Minimum suggested time to invest	One month	Not applicable
Target asset allocation	100% Cash	100% Mortgages
Estimated number of negative annual returns	Low, less than 1 year in 20	Low to medium, between 1 and 2 years in 20
Management costs (% pa)	1.35%	2.00%
Fund Manager	Antares	AXA

Access Challenger Howard Wholesale Mortgage (closed)	Access Antares Premier Fixed Income Fund (formerly Access Aviva Investors Premier Fixed Income Fund)
Aims to provide investors with a diversified income producing portfolio that delivers regular income and capital stability.	To outperform its benchmark over a rolling three year period by investing in a broadly diversified portfolio of fixed income securities (both Australian and global).
The Fund gains its investments by investing in the Howard Mortgage Fund. The Fund will be invested in a diversified portfolio of mainly commercial mortgage loans and interest-bearing securities. The Fund may also invest in cash and other short-term investments. The Fund may make investments directly or indirectly by investing in other managed funds that have substantially the same principal investments.	To invest in a broadly diversified portfolio of fixed income securities (both Australian and global). It seeks to enhance returns and improve diversification by including high yield fixed income and exposure to bonds issued by overseas governments. The Fund may invest up to 20% in cash.
<ul style="list-style-type: none"> ■ you want income through a portfolio of mortgages and you're prepared to accept some variability of returns. 	<ul style="list-style-type: none"> ■ you want access to a diverse portfolio with exposure to both Australian and global fixed income markets via a single diversified fund, and ■ you want a medium risk investment providing income and some capital growth over the medium to long term.
Not applicable	Three years
Not applicable	75% Australian debt securities 25% Global debt securities
Low to medium, between 1 and 2 years in 20	Medium to high, between 3 and 4 years in 20
2.00%	1.70%
Fidante Partners Limited	Antares

Investment option profiles (cont.)

	Access PIMCO EQT Global Bond Fund	Access BlackRock Monthly Income (closed)
Investment objective	To achieve maximum total return by investing in global fixed interest securities and to preserve capital through prudent investment management.	To achieve a total return of 1.70% pa in excess of the UBS Australia Bank Bill Index before fees over the medium-term. There may be variations in performance in periods of extreme market volatility.
About the investment option	The Fund invests predominantly in Investment Grade government, corporate, mortgage and other fixed interest securities. It may also invest in non-Investment Grade fixed interest securities and Emerging Market Debt. The Fund will normally be hedged 90-110% to the Australian dollar.	The Fund invests in debt securities or other debt instruments issued or guaranteed by governments and corporates or asset backed securities. Derivatives may be used. A minimum of 75% of the Fund must be held in securities rated investment grade or better (ie at least BBB-). International debt securities are substantially hedged back to the Australian dollar.
The investment option may be suited to you if	<ul style="list-style-type: none"> ■ you want to have a broadly diversified exposure to international fixed interest markets. 	<ul style="list-style-type: none"> ■ you want potentially higher returns than cash with access to a regular monthly income stream, with some volatility.
Minimum suggested time to invest	Five to seven years	Three years
Target asset allocation	100% Global debt securities	100% Australian and international debt securities (all exposures are intended to be hedged back to \$AUD floating rate exposures)
Estimated number of negative annual returns	Medium, 2 years in 20	Medium, 2 years in 20
Management costs (% pa)	1.80%	1.90%
Fund Manager	Equities Trustees Limited	BlackRock

Access AMP Capital Enhanced Yield (closed)	Access Challenger Guaranteed Income Fund (closed)
<p>To provide a regular and consistent level of income. Aims to provide returns above the Reserve Bank of Australia Cash Rate (after costs and before tax). Aims to return capital to investors over time via capital distributions.</p>	<p>Aims to provide specified and regular income until 31 March 2014 as well as a maturity price of \$1.00 per unit by holding on annuity by Challenger Life.</p>
<p>The Fund invests in private debt and has a small holding in cash and liquid securities.</p>	<p>The Fund invests in an annuity issued by Challenger Life that closely matches the distributions, maturity unit price and maturity profile of the units in the Fund.</p>
<ul style="list-style-type: none"> ■ the Fund is currently illiquid with available liquidity being paid to investors via pro-rata capital distributions. As we return capital to investors over time the credit risk of the Fund will likely become more concentrated and increase. 	<ul style="list-style-type: none"> ■ the investment option is closed to new and additional investments.
<p>Three to five years</p>	<p>To maturity</p>
<p>100% Debt securities</p>	<p>100% Securities and cash</p>

Access Pre Select Australian Equity	Access Alphinity Boutique Australian Equity (formerly Access Pre Select Boutique Australian Equity)
To provide medium to long-term capital growth by primarily investing in a well diversified portfolio of Australian equities listed on the Australian Securities Exchange (and other regulated exchanges).	To outperform the S&P/ASX 300 Accumulation Index over rolling three-year periods.
Invests in a variety of Australian companies whose share price is expected to appreciate over time. These investments are made through specialist managers. The likelihood of this portfolio incurring a negative return in any particular year is high.	The Fund is managed by Alphinity who seeks to build a diversified portfolio of between 35-55 Australian stocks listed on the Australian Securities Exchange (ASX). Alphinity is an active, core Australian equities manager that believes a company's earnings growth and expected earnings growth ultimately drives its share price performance. Alphinity's investment approach is based on a combination of strong fundamental bottom-up research and targeted quantitative inputs aimed specifically at identifying mispriced companies likely to deliver earnings in excess of those expected by the market.
<ul style="list-style-type: none"> ■ you want to invest in an actively managed Australian share portfolio that's diversified across investment managers, industries and companies. 	<ul style="list-style-type: none"> ■ you want exposure to the Australian listed sharemarket.

Access Perpetual Geared Australian Equity	
Investment objective	To enhance long-term capital growth through borrowing (gearing) to invest in quality shares.
About the investment option	<p>Perpetual researches companies of all sizes using consistent share selection criteria. Perpetual's priority is to select those companies that represent the best investment quality and are appropriately priced.</p> <p>The Fund invests primarily in Australian listed or soon to be listed shares but may have up to 20% exposure to stocks outside Australia. Currency hedges may be used from time to time. Derivatives may be used including for gearing purposes.</p> <p>The gearing level of the Fund (borrowings divided by the total gross value of assets) must be kept within pre-determined guidelines. Within these, Perpetual aims to ensure that the gearing level is maximised, subject to the cost of borrowing being adequately covered by net income. If the Fund's gearing level exceeds 60% (due to withdrawals or negative market movements), Perpetual will reduce the gearing level to 60% (or lower) within a reasonable period of time.</p>
The investment option may be suited to you if	<ul style="list-style-type: none"> ■ you want to invest in a portfolio of Australian shares.
Minimum suggested time to invest	Seven years
Target asset allocation	0-10% Cash 90-100% Australian shares 0-60% Gearing level
Estimated number of negative annual returns	High, nearly 6 years in 20
Management costs (% pa)	2.42% (assumes no gearing)
Fund Manager	Perpetual

Access Pre Select Australian Small Companies	Access Investors Mutual Australian Shares
To provide medium to long-term capital growth by primarily investing in Australian smaller companies (generally outside the top 100 by market capitalisation) listed on the Australian Securities Exchange (and other regulated exchanges).	To provide a return (after fees and expenses and before taxes) which exceeds the S&P/ASX 300 Accumulation Index, over rolling four year periods.
Invests in a variety of Australian small companies considered to possess strong capital growth potential. These investments are made through specialist managers that exhibit varying investment approaches. The likelihood of this portfolio incurring a negative return in any particular year is very high.	The Fund invests in a diversified portfolio of quality Australian industrial and resource shares, where these shares are identified by the investment team as being undervalued. The Fund will usually hold a minimum of 20 different securities.
<ul style="list-style-type: none"> ■ you want exposure to smaller capitalisation securities listed on the Australian sharemarket and are comfortable with considerable fluctuations in returns. 	<ul style="list-style-type: none"> ■ you want to invest in a portfolio of ASX listed Australian and New Zealand industrial and resource shares.

Access Schroder Australian Equity	Access International Shares Index
To outperform the S&P/ASX 200 Accumulation Index after fees over the medium to long-term.	To closely track the MSCI World (ex Australia) Index with the aim of generating returns (before tax and fees and assuming income reinvested) comparable to the world sharemarkets as measured by that benchmark (unhedged).
The Fund invests in a broad range of companies from Australia and New Zealand. It invests predominantly in stocks characterised by strong returns on capital and a sustainable business franchise using a fundamental bottom-up, active management style.	Detailed risk analysis is used to design a portfolio of shares which provides the greatest likelihood of matching performance of the MSCI ex Australia Index. Foreign currency exposures are not hedged to the Australian dollar.
<ul style="list-style-type: none"> ■ you want growth, and ■ you also accept that the value of your investment can change. 	<ul style="list-style-type: none"> ■ you want exposure to international shares, and ■ you're willing to accept negative returns from time to time for returns that can be expected to be higher than other asset classes over the longer term.

	Access Pre Select International Equity	Access Aberdeen Actively Hedged International Equities
Investment objective	To provide medium to long-term capital growth by primarily investing in a well diversified portfolio of equities listed on stock exchanges around the world.	To provide investors with high capital growth over the medium to long term by seeking exposure to companies listed on securities exchanges around the world.
About the investment option	Invests predominantly in companies listed (or expected to be listed) on share markets anywhere around the world, and is typically diversified across major listed industry groups. These investments are made through specialist managers. The likelihood of this portfolio incurring a negative return in any particular year is high. The portion of the currency exposure that is hedged to the Australian dollar may move within the range 0 to 100%.	The Fund invests primarily in a concentrated portfolio of around 40–60 listed international securities (other than those listed on the Australian Securities Exchange or other regulated exchanges) with the potential for capital growth and increased earning potential.
The investment option may be suited to you if	<ul style="list-style-type: none"> ■ you want to invest in an actively managed international share portfolio that's diversified across investment managers, countries, industries and companies, and ■ you're comfortable with exposure to foreign currencies. 	<ul style="list-style-type: none"> ■ you want to invest in a portfolio of international shares.

AXA Global Equity – Value Fund	Access Perpetual International Share Fund
To provide long-term capital growth and outperform the Morgan Stanley Capital International World ex-Australia Index (net dividends reinvested in Australian dollar terms) after costs over rolling five-years.	To provide long-term capital growth through investment in international shares.
The Fund invests in companies that appear undervalued relative to long-term earnings potential. Companies will have a minimum market capitalisation at purchase of US\$750 million. Investments in foreign markets will be exposed to relevant foreign currencies. Currency management may be used to modify the foreign currency exposure. Cash may be held if appropriate investments aren't available.	The Fund primarily invests in publicly traded, or to be listed, global equity securities, including emerging markets. The focus is on investing in stocks of companies the investment manager believes are solid but temporarily out-of-favour and provide above-average total return potential. The country and sector allocations within the Fund are a result of the stock selection process. The currency exposure of the Fund is typically unhedged, although currency hedging may be used to protect investments at the discretion of the investment manager. Derivatives may be used in managing the Fund.
<ul style="list-style-type: none"> ■ you want long-term capital growth, and ■ you're prepared to accept a high level of volatility and risk as a trade-off for returns that might typically be expected to be above those returned by other asset classes over the longer term. 	<ul style="list-style-type: none"> ■ you want a portfolio of international shares.

Access Platinum International Fund	
Investment objective	To provide capital growth over the long-term through searching out undervalued listed (and unlisted) investments around the world.
About the investment option	<p>The Fund primarily invests in listed securities. The portfolio will ideally consist of 100 to 200 securities that Platinum believes to be undervalued by the market. Cash may be held when undervalued securities cannot be found. Platinum may short sell securities that it considers overvalued. The portfolio will typically have 50% or more net equity exposure. Derivatives may be used for risk management purposes and to take opportunities to increase returns.</p> <p>The underlying value of derivatives may not exceed 100% of the Net Asset Value (NAV) of the Fund. The underlying value of long stock positions and derivatives will not exceed 150% of the NAV of the Fund. Currency exposure is actively managed.</p>
The investment option may be suited to you if	<ul style="list-style-type: none"> ■ you want long-term wealth creation potential of share investments ■ you want to achieve investment diversification by accessing international share market opportunities, and ■ you accept that returns over the shorter term may fluctuate and that returns may even be negative.
Minimum suggested time to invest	Five years
