

# MLC IncomeBuilder™

# Quarterly distribution summary 31 May 2011

#### **Underlying Income Distributions**

The May quarter end distribution, the last for the 2010/11 financial year, showed a continued improvement in income compared to recent prior quarters and a reasonable increase in the total distribution for the year, although still below prior peaks.

#### **Quarterly Underlying Income Distribution Comparison**

	2009/10	20010/11	% Change
Quarter 1 (Aug)	1.15	1.21	5.22
Quarter 2 (Nov)	1.85	2.19	18.38
Quarter 3 (Feb)	1.15	1.71	48.70
Quarter 4 (May)	2.47	2.77	12.15
Total	6.62	7.88	19.03

Source: MLC IncomeBuilderTM Unit Trust

For the quarter ended 31 May 2010 the MLC IncomeBuilder<sup>TM</sup> Unit Trust produced an underlying income distribution of 2.77 cents per unit. This is 12% higher than the previous year's 2.47 cents per unit distribution.

Key company dividends contributing to the May distribution were:

**Commonwealth Bank** - Commonwealth Bank increased its first half dividend by 10% on improved profits, largely flowing from a reduction in the bad debt charge during the half.

**Wesfarmers** - Wesfarmers increased their dividend by 18% over the half as they enjoyed higher levels of profits from their key businesses such as Coles, Bunnings and a strong recovery in the coal business from a break-even outcome during the comparative half.

**Woolworths** - Woolworths continued their track record of growing dividends with an 8% increase, despite facing tougher operating conditions.

**Coca-cola Amatil** - Coca-Cola increased its dividend 12% as operating results improved on the back of market share and gains from product mix.

On the downside we saw lower dividends being declared by a number of companies that are still in the process of normalising their dividend payout ratios.

## **MLC Investment Management**

**Primary Healthcare** – Primary Healthcare cut its dividend sharply on the back of lower earnings flowing from a number of non-recurring expense items.

**TAB Corp** - Tabcorp also cut its dividend (-20%) to better reflect the likely ongoing payout ratios of the demerged businesses (to take place in June 2011). Earnings for the group were relatively flat but Tabcorp is currently incurring significant capex at Star City and has also expressed an interest in the Victorian wagering licence.

The May distribution also includes capital gains for the year as it is the final distribution. The capital gains portion of the distribution was very low at 0.02 cpu and was made up entirely of concessional capital gains. Capital gains realised during the year were a result of normal buying and selling as well as cash components of takeovers of AXA and Crane Group. Capital gains were offset by capital losses during the period.
