What contributed to positive returns?

- Especially strong returns from global shares**, which were powered by impressive earnings from a handful of technology stocks.
- Unlisted assets – investments in companies and businesses not listed on stock markets** – provide the MLC MySuper Growth Portfolio with valuable sources of diversification that have, in recent years, contributed significantly to performance.
- Our unlisted real estate investments are currently weighted towards the industrials sector**, which continues to benefit from the e-commerce and digitisation trends.
